New Church Opened.

Quite a large congregation was present Sunday at the dedication services of the new Lutheran church in Stony Plain. Rev E. Eberhardt was in charge of the service. Rev Mr Miller of Calgary preached the sermon at the morning service, and other clergymen present were: Rev Professor Schatzman of Edmonton, Rev E. Shippanowski, with Rev H. J. Boettcher presiding at the organ.

Services were held in the afternoon, when Rev Mr Boettcher of Edmonton preached a sermon in the German tongue, followed by a very interesting discourse in English delivered by Pastor Miller from Calgary.

Prevention and Cure of Goitre

In view of the prevalence in this province of that disease goitre, the following article from the pen of Dr R. A. Walton, a graduate of McGill University, will be read with interest. The remedy suggested is so simple and easily applied, no excuse can obtain for non-compliance.

Goitre may easily be prevented in the majority of cases. If iodine is lacking in the drinking water or food, the disease is very apt to appear sooner or later.

Goitre may be prevented by using ordinary table salt to which has been added a very small amount of iodine. The flavor and appearance of the salt is in no way changed, and it is used for cooking purposes as any ordinary salt. It is known as iodized table salt and is obtainable in any grocery store. One company is already manufacturing it, and the rest should soon follow.

LOCAL NEWS.

Monday next (Labor Day) is a public holiday, and all the places of business in Stony will be closed.

After this date, the places of business in Stony Plain will be open every afternoon in the week.

On Saturday, August 23d, to the wife of Jac Altheim, a son.

In Stony Plain, August 24, to the wife of Henry Sinner, a daughter.

In Strathcona, on Sunday August 17, to the wife of J. L. McCabe a son.

Mr Wm. Price, Edmonton, was a week-end visitor with Mr Philip Miller.

Mr Geo. Smith leaves today for the West.

Mr W. Taylor, Halkirk, was a visitor of Mr Michael's over the week-end.

Miss Ale was the guest of Miss Donatson at Edmonton Beach, for several days.

Mr Edwards is in the teller's cage this week at the local bank.

Banker Founds is enjoying a vacation at the Edmonton Beach, where a number of Scout patrol leaders were in conference this week.

Mrs John Knebel returned to her home in Strathcona on Sunday, after a two-week visit with friends in this district.

Messrs Bishop, R. Heichen, Harvey and Cecil Umbach went to Olds last week, to work on an elevator.

Mr S. H. Kettle, the well-known journalist and traveler, has two of his sons from England visiting with him at his ranch north of town.

When Joe Goodwin, the youth committed for trial at Stony Plain on a charge of theft of a horse, came up before Judge Dubuc in Edmonton last week, he was allowed out on suspended sentence.

A meeting of members of the Wheat Pool is called for Saturday evening.

A drive will shortly be made in the U. F. Locals for members to the new Live-stock Pool.

The first of a series of lectures under the auspices of the I. B. S. A. were given in Stony Sunday evening, when Mr O. Nelson spoke on "The Kingdom of Messiah: Is It Here?" The next lecture will be given in the same place Sunday Aug. 31 by Mr Geo. A. Ware on "What Creed is the Truth?"

Calendar.

August.
30—Postoffice football game at Stony.
30—Wheat Pool members meet in Stony.
Sept. 1—Labor Day.
5—Inga Councilors meet.
15—Open season for ducks and geese.

A Better Day Dawns

After years of negotiations, and following the failure of one conference after another to make any substantial headway, an agreement has at last been reached with Germany regarding the payment of reparations which gives promise of putting an end to the impossible situation so long prevailing in Europe and which has brought economic distress throughout the world.

The agreement reached, based on the Dawes report, has received the unanimous approval of the British, French and German cabinets and is fully acceptable to Belgium. France and Belgium have undertaken to evacuate the Ruhr within one year, and in all probability the evacuation will be completed within a less space of time. Already certain towns in Baden have been evacuated.

At the conclusion of the conference in London at which the agreement was reached, the Premier of France and the Chancellor of Germany shook hands. This was the first post-war conference, says one of the German participants, in which the words "vanquished" and "victors" were dispensed with, and he adds: "Throughout the negotiations we were never made to hear one disagreeable word." On his return to Berlin, the German Chancellor expressed his belief that the French Premier was sincerely desirous of promoting the peace of Europe, (that he was actuated by the best intentions and could be trusted). It is further reported that France and Germany will shortly begin negotiations concerning commercial treaties.

Not quite six years have elapsed since the signing of the Armistice which ended actual hostilities in the Great War, and while it seems a long period of time in which to bring about an agreement regarding a matter which was first covered by the Peace Treaty, it is not, after all, such a long time in which to allow the most bitter feelings and to quiet the deep-rooted suspicions of each other following more than four years of warfare and unprecedented loss of time and property.

People are apt to grow impatient with diplomats and statesmen entrusted with the handling of delicate international questions, and to become very critical of them because more rapid progress is not made in the settlement of outstanding problems and disputes. But how often is some petty family quarrel or dispute among neighbors over a trifling matter allowed to continue from year to year, and even from generation to generation. And nations are only big families and neighbors, and all the faults, jealousies, suspicions of individuals are reflected in the nation. The chosen leader of the people in each country must pay attention to the opinions of his people, and those who complain of slowness in action should realize that public opinion in each and every country must first be educated, and suspicions allayed before progress can be made.

The fact that so much progress toward a better understanding in Europe has been achieved is a matter for profound congratulation, not to the peoples of Europe alone, but to the whole world. Before 1914 Canadians gave little heed to European quarrels, and regarded them as something which were no particular concern of residents on this side of the world. But the Great War brought a sudden and bitter awakening. We learned that not only our material progress, but the lives and liberties of our people were jeopardized through issues which were not of our making. And since the Armistice we have had daily reminders through depression in trade and economic losses of many kinds that as nations today can live unto itself, and that what adversely affects one part of the world affects all.

In Canada, therefore, we have reason to rejoice that an agreement has been reached paving the way for a better understanding in Europe, for a relaxation of the state of war which has to all intents and purposes existed through the French and Belgium occupation of the Ruhr, and for the replacement of old suspicions and fears by a mutual acceptance of a sincere intention by all to live up to their obligations to the one to the other.

The London conference in its final results, gives promise of better days, and renewed prosperity throughout the world.

Trying Out New Scheme

Good Conduct Convicts From English Prison Given Holiday

More than 30 "star men," or good conduct convicts, from Maldstone Prison, have arrived at the "prison boat" of English "J. H. Hedges" and brought a sudden and bitter awakening. We learned that not only our material progress, but the lives and liberties of our people were jeopardized through issues which were not of our making. And since the Armistice we have had daily reminders through depression in trade and economic losses of many kinds that as nations today can live unto itself, and that what adversely affects one part of the world affects all.

This is stated to be the first trial of a new development in the humanizing of the penal system.

Living in what are more like cottages than prison cells, the selected

men will work in the forest of Parkhurst, where each man is allowed to cultivate his own garden one day a week.

The convicts wear sailor caps, navy blue jackets, with red arm stripes for good conduct, and breeches different from the ordinary prison clothing. They take their meals together and meet each evening in a smoking room, where newspapers, books, tobacco and cigarettes are allowed.

They can expend their earnings (awarded for good conduct) on luxuries purchasable at a canteen—a "dry one, however.

The "holiday" will last about three weeks.

Northern Ontario Exports Increase
Exports of the products of Northern Ontario to United States for the first six months of the year showed an increase of approximately 45 per cent. over those for the same period of last year, according to statistics of the American consular at North Bay. The total value of exports for the period was \$24,937,510 in comparison with \$17,192,808. Gold bullion exports show an increase of more than 100 per cent; silver bullion of 50 per cent; furs, 450 per cent; and newsprint 40 per cent.

Relief from Asthma. Who can describe the complete relief from suffering which followed the use of Dr. J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when its soft and gentle influence relieves the tightened, choking air tubes? It has made asthmatic affliction a thing of the past for thousands. It never fails. Good druggists have sold it for years.

More than 200,000 homes have been built in Great Britain since 1919.

The Power of Advertising

Found To Be An Economic Force Of The First Order

Our forefathers talked about supply and demand as if there was a natural and perfect adjustment between the two. The modern business man has discovered the demand must often be created, and that advertising is the one essential element in its creation. Advertising is thus not merely an adjunct or an equipment; it is an economic force of the first order, and the advertising expert occupies a place in the hierarchy of industry and commerce not less important than that of the elements which the older economists alone designed to notice. Advertising is no longer a matter of private interest. It is one of national and international importance.—The London Evening Standard.

TOO MANY HOME CARES

One Reason Why So Many Women Are Sick and Run-Down

The work of the woman in the home makes greater demands on her vitality than men realize, and there is always something more to do. No wonder women's backs ache, and their arms are worn out. No wonder why they get depressed and irritable, suffer from headaches, and always feel out of sorts. But of course all women are not like that. What is the difference?

A woman with plenty of healthy red blood in her veins finds her life in the home easy; her vitality is at par. This points the way to the ideal in women who feel run-down and depressed. Make new rich blood. You can do it with Dr. Williams' Pink Pills. These pills have the marvellous property of building up the blood and toning up the nerves. Thaiside proved by the case of Mrs. E. Epinger, Scott Street, Vancouver, B.C., who says:—

"Dr. Williams' Pink Pills brought back my health and strength and restored my nerves to normal condition after other medicines had failed. It was after the birth of my second child that I became so anemic and nervous that I thought I would lose my mind as well as my strength. I tried several medicines, but got no relief until I was advised to try Dr. Williams' Pink Pills. After using a few boxes of these I could see a change. I felt stronger; my appetite was better. I slept better, and my nerves were stronger. I continued the use of the pills for some time, and again found myself a well woman, and I can sincerely say that my health has since been the best. I would heartily recommend the pills to all weak, run-down women."

You can get these pills from your druggist, or by mail for 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Discovering the Arctic

Great Mistake to Regard Data as Valueless Says J. D. Craig

The leader of an expedition sent to the islands in the Arctic by the Canadian Government, J. D. Craig, D.L.S., thinks that it is a great mistake to regard these as valueless. The data obtained warrants, he holds, the belief "that some day possibly in the not too far distant future, our little known far northern districts will prove to be more than merely a source of interest to the explorer, the big game hunter and the trader." The example of Alaska, with all the development that is going on there, is cited by Mr. Craig for the purpose of warning Canadians against too lightly assuming that the country lying towards the Arctic and the islands in that ocean are so much frozen waste.—From the Edmonton Bulletin.

Its Quality Sells It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Electric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sicknesses. As a specific for cuts, burns, scalds and the various inflammatory pains its record is beyond reproach.

New Lumber Company in B.C.
The Skeena Lumber Company has been registered with capital of \$500,000 to take over the Kleasna Company, Ltd., lumber and mining operators at Uak. The new company is financed by Minneapolis capital and has power to establish a pulp and paper mill.

All mothers can put away anxiety regarding their suffering children when they have Mervin's Electric Extremator to give relief. Its effects are sure and lasting.

Jupiter is nearer the sun by more than 40,000,000 miles in one part of its orbit than in the opposite part.

Minard's Liniment Relieves Pain

TANLAC MEETS TEST FOR OVER 3 YEARS

"The more I know about Tanlac the more I feel like praising it," says Mrs. Samuel Shelly, 56 Wood St., Toronto, Ont., Canada. "I always take Tanlac when I begin to feel run-down and it has met my health needs for the past three years."

"For years before I learned of Tanlac I was in such a awful run-down condition that at times I would sit so weak and nervous I couldn't do my house work. I found it took to almost a skeleton and still losing weight all the time. Headaches nearly drove me

mad and I had a sickly, sallow complexion."

"Tanalac has increased my weight 14 pounds, and has given me a wonderful appetite. My nerves are steady. I sleep well and have health and strength that makes life a pleasure."

Tanalac is for sale by all good druggists. Accept no substitute. Over 40 million bottles sold.

Tanalac Vegetable Pills for Constipation; made and recommended by the manufacturers of Tanlac.

Thousands in Wembley Pageant

Twenty-Five Thousand Wheat Sheaves From Canada Used

The opening of the British Empire Pageant in the Stadium at Wembley, fixed for July 21, was postponed for a few days owing to insufficient rehearsal. The pageant told the story of the British Empire in a series of dramatic episodes.

Fifteen thousand people took part in the spectacle. Its magnitude may be gauged by the fact that the following were among the requirements:

5,000 wigs.
15,000 costumes, for which 25 miles of cloth were used.

10,000 square yards of canvas scenery.

Artificial lake containing 237,000 gallons of water.

Largest carpet in the world, covering half the Stadium.

Five miles of steel wire for alterations in the arena.

Two and a half tons of nails.

200 tons of timber.

Full-sized cathedral front.

Ships and houses, full sizes.

25,000 sheaves of wheat from Canada.

In one scene 1,000 white doves were employed.

For Sore Feet—Minard's Liniment

Zanzibar, an island off the east coast of Africa, was received by the British from Germany in exchange for Heligoland.

Attacked By Eagle

Fourteen-Year-Old Boy Lifted Five Feet By Huge Bird

To be attacked by a big bald-headed eagle, picked up and carried into the air five feet, then dropped when his clothing gave way, was the experience of Fred Cunningham, aged 14, weighing 97 pounds, on a golf course near Chatham, Ont. The bird, which was killed later, measured eight feet from tip to tip of wings. Young Cunningham was severely scratched and clawed while fighting the bird, which finally became enmeshed in a wire fence.

Miller's Worm Powders were devoted to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

To Maintain Empire Fair
The British Empire Exhibition will be open again next year at Wembley, according to the parliamentary correspondent of The Daily Telegraph, who states he has learned of this on the highest authority.

W. N. U. 1529

Object Of Agricultural Research To Increase Yields Without Increasing Production Cost

The great problem which today confronts agriculturists is not one of bumper crops, but of adaptation, and the main object of agricultural research is to enable the practical farmer to increase his yields without increasing his costs. These were the conclusions formulated by R. A. Fisher, of the Rothamsted Agricultural Experimental Station in England, in presenting his paper to the agriculturists on "Incidence of rainfall in relation to the wheat crop."

The problem of determining the actual effects of weather upon the crop is one of extreme complexity, according to Prof. Fisher. The crop is subjected to a long sequence of variable weather conditions and the meteorological measurements adequate to represent the weather must comprise at least, rainfall, temperature, maximum and minimum, and dew, together with some measure of sunshine intensity. In consequence of the immense numbers of varieties needed to specify the weather history of a crop it would not be easy to obtain formulae from past records. Such formulae would be practically useless because even data wholly unrelated to the weather could equally easily be so expressed. In fact, a short series of crop statistics would themselves to the evaluation of apparent effects of weather upon the crops. What was needed at the present time, he said, was a solid foundation of facts, based upon reliable, extensive data and quite simple meteorological factors.

In showing the action of rain as indicated in manual conditions, upon the screen with the aid of slides, he stated that the data gave more than seventy years of work records from experimental plots covering a wide variety of manual treatments.

For almost the whole of the series detailed rain data was available. "The main object of agricultural research," said Prof. Fisher, "is to enable the practical farmer to increase his crop without increasing his cost. It is in fact not a problem of bumper crop production, but adaptation. The very variable weather of most districts is the greatest obstacle in the way of an accurate adaptation of farming methods to the local conditions."

"In the second place," he continued, "a knowledge of the different responses to weather and manual conditions, and these differences are great, could enable the farmer to adapt his manual treatment to the climatic and seasonal conditions under which his crop has to grow. It will, in fact, enable him to mitigate the losses of a bad season or to exploit the advantages of a good one."

"Finally, weather studies are intimately related to the improvement of varieties. The problem before the plant breeder is to obtain varieties susceptible to regions. Here it is again the differential response to weather of different varieties which must guide the agriculturist in assigning to the best existing varieties their approximate geographical provinces. We must find out not only which variety is best, but where it is best."

"The results obtained so far have depended upon the immensely long records of a single station. How can we obtain information bearing upon the practical problems of other districts without waiting for the accumulation of seventy years of new data? This is a problem in research organization. Parallel manual or varietal trials carried out at a number of different stations with this adequate requirement by modern plot techniques will provide data as abundant as that available at Rothamsted, covering an equally wide range of weather conditions and with the additional advantage that the effects of the different soils can be adequately explored."

The Sault's wife was walking along the road when she saw one of these late workers in the distance coming towards her. "They came abreast, but the workman took no notice of the lady, so she stopped him and said: 'Why did you fail to take your hat (Glee)!' If you please, mum," said Glee slowly, "my wife died last Wednesday, and I ain't started lookin' at other women yet."

W. N. U. 1532

Canada Has Immense Resources In Coal

Survey Indicates That Possibility Of Exhaustion Of Supplies Is Remote

Attention was directed during recent scientific gatherings in England to the possibility that the coal resources of the British Empire may be exhausted within a few centuries. So far as Canada is concerned such a contingency seems to be remote. For many years the Canadian Geological Survey has been investigating the coal fields of the Dominion, and it has been estimated that the reserve of coal amount to more than 1,000,000,000,000 tons largely lignite, but including some 250,000,000,000 tons of bituminous coal. Though the greater part of the various coal fields has been studied in a general way, yet their extent is so great that detailed investigations by the Geological Survey have been limited to a relatively small part of the whole. The great extent of the Canadian coal fields is apparent when it is realized that basins of coal-bearing strata extend almost continuously for a length of 700 miles within the eastern part of the Rocky Mountains and adjoining foothills. The coals of this region are largely bituminous or semi-bituminous and seams ten to fifteen feet in thickness are common. In addition, thousands of square miles of the prairie country of Alberta, Saskatchewan and Manitoba are underlain by strata holding workable seams of lignite and bituminous coals, and important coal beds occur in British Columbia both in the interior and on the Pacific coast, while highly developed coal fields occur in the east in Nova Scotia and New Brunswick, in some cases at tide water.

Mineral Matter For Hogs

Experiments Show Cheaper Gains Made When Mineral Matter Was Fed

An experiment in hog feeding has been carried on at the Experimental Farm at Agassiz, B.C., to determine the influence of feeding mineral matter to hogs. The mineral mixture consisted of ground bone meal 3 pounds, ground charcoal 5 pounds, ground rock phosphate 5 pounds and salt 3 pounds. This mixture was fed at the rate of 3 per cent of the ration. The other foods consisted of a mixture of shorts, four parts, and one part each of corn, chopped oats and chopped barley. The results showed that, in every instance where the mineral was fed, greater and cheaper gains were made. Some of the lots received boiled potatoes in addition to the other feeds. It is reported by Mr. W. H. Hicks, the Superintendent, who conducted the experiment, that the position apparently has a good effect, especially on the health of the pigs, more particularly in relation to rheumatism, as no stiffness was present in any of the pens where potatoes were fed. "Some of the pigs were fed regularly at meal time, while other pens had access to self feeders. The pigs that had free access to the self feeders and received no mineral were the greatest sufferers from rheumatism."

Honey For Export

Dominion Apiarist Calculates 6,000,000 Pounds Will Be Available

"I am sure that this year's honey crop of Canada will admit of 6,000,000 pounds being available for export," stated C. H. Gooderham, Dominion Apiarist, who has returned to Winnipeg following a tour of the west. Mr. Gooderham said there would be a good crop of honey from the prairie provinces and British Columbia this year, but owing to drought in some sections, it would not exceed last year's crop in the aggregate. Prospects were particularly good in the Fraser Valley, B.C., and Southern Alberta.

The author had stated his case in a few halting sentences. "But have you achieved any success in life?" asked the adored one's father. "Oh, boy! Have I!" blurted the happy youth. "Why, didn't I make it clear to you that your daughter has promised to be my wife?"

U.S. and Europe

Americans Beginning to Realize That Well-Being of Nation Bound Up With Rest of the World

It is many years since an American Senator asked scornfully, "What have we to do with abroad?" That spirit may persist in a few of our countrymen, but the inexorable fact of international relations—the economic fact, if no other—are making it clear to all Americans, except those afflicted with judicial blindness, that our well-being is increasingly bound up with that of the rest of the world. The large and increasing stakes which America has abroad is indicated by the extent of American investment in foreign securities. These are conveniently summarized, as drawn from successive reports of the Federal Reserve Board, in an article published in The Current History Magazine for August. The best estimate is that ten years ago American holdings of foreign securities did not exceed \$400,000,000. But between August, 1914, and January, 1919, foreign bonds were floated in the United States to the extent of \$3,500,000,000. During the period January, 1919, to January, 1924, the total of foreign bonds floated in the United States was \$2,250,000,000. These latter transactions were doubtless in part refunding operations, but even so the outstanding total represents a great sum on which it is safe to say that the interest is larger than our entire foreign investment of 1914. Yet there are some clear-eyed Americans who cannot see what business American bankers and American public officers have in London trying to bring about industrial and financial stability in Europe!—The New York Times.

Private Capital To Control Lignite Plant

Saskatchewan Government Wants Firm To Take It Over

Control of the lignite plant at Blenheim, Sask., is now in the hands of the Saskatchewan Government, which is negotiating with one or two firms to take it over and operate it as a commercial utility, according to an announcement of the minister in charge of industries. "The plant has served its purpose in demonstrating the possibility of making briquettes from carbonized lignite," the minister stated, "and what remains now is to prove the commercial feasibility of the project. It is not the policy of this Government to embark on any commercial undertaking and we will therefore endeavor to secure private capital to undertake the commercial operation of the plant."

Adams, in a scientific sense, are so small that a million of them, placed side by side, would not measure as much as the thickness of a sheet of paper.

OUR GALLERY OF RIVER CAPTAINS

Britain Will Advance Money To Assist Emigration From United Kingdom To Canada

Corn Silage Superior

Corn Silage Proven To Be Better Than Sunflower Silage

In a cow feeding experiment at the Agassiz, B.C., Experimental Farm, corn silage was compared with sunflower silage. In addition to all the ensilage the cows would eat, which amounted to 60 pounds of sunflower and 87 pounds of corn, each cow was fed twenty pounds of pulp mangels and five pounds clover hay. As a grain mixture each cow received twelve pounds a day, made up of three parts bran, three parts oat chaff, two parts barley chaff, and one part of meal. There were also cows in each lot. The cows that were fed corn ensilage produced two pounds milk per day more than those receiving sunflowers, and the milk of the former was slightly richer. The total cost of feed consumed during the experiment was \$20.10 for the corn silage fed lot, and \$27.92 for the others. The corn silage proved to produce both milk and fat cheaper than the sunflower silage, the difference being 2.196 cents per hundred pounds, and 2.142 cents per pound of butter, in favor of the corn silage.

The Coconut Harvest

One Tree Said To Yield As High As 300 Coconuts Each Year

South Sea Islands commerce centres around the production of coconuts. Copra is simply the dried kernel of the ripe coconut. From the time of planting coconuts until a crop is harvested is about seven years in the western Pacific groups. It is estimated in Tonga that one tree will produce annually 200 coconuts.

The "low" islands, that is, those of purely coral formation, are reputed to produce the best nuts, and the atolls of Tonga and Marquesas are practically covered with trees which have grown from "self-grown" seed. These are the common property of the natives. Of copra producing areas, the little Nukunono in the Tonga group has the reputation of producing the largest coconuts in the world.

Writers who drift through the Pacific are always enthusiastic on the smells of the islands. Actually, the perfume of the South Sea is the "perfume" of coconut oil.

Harmless Dinner (tongue to waiter)—You've spilled that soup all over my coat.

Waiter—It's all right, sir. I know the soup here; it never stains after six o'clock.

It is reported from Ottawa that Hon. J. A. Robb, acting Minister of Finance and Minister of Immigration, has concluded an agreement with the British Government whereby the home government will advance money for the settlement and equipment of emigrants from the United Kingdom to Canada. This is heralded as an epoch-making agreement and as an earnest for Canada a wave of settlement on a larger scale than any since the pre-war period.

The agreement, it is understood, calls for the investment of millions of dollars by the British Government in Canada. The immigrants to be placed on the homeland are to be placed on land and equipped with machinery at the expense of the home government. The settlers will be handled by the Land Settlement Branch of the Department of Immigration, which is the same as the Soldiers' Settlement Board. The money is to be advanced through this agency, and the collections are to be made through the Soldiers' Settlement Board officials and sent throughout the Dominion, and remitted to England.

The exact terms of the agreement are not certain. It is learned that the total cash advances to settlers will be on a smaller scale than that of the Canadian Government to the Canadian soldier. Further, it is said, the agreement is only for one year, 1925, and then the home government will decide whether the results are sufficiently good to warrant a renewal for a further period.

The immigrants to be settled in this manner are to be selected, but whether by the British Government or the Canadian authorities, or by both, is still undetermined. Complete details, it is expected, will be forthcoming shortly.

Hitherto the assistance afforded settlers from the United Kingdom has been confined to reducing the cost of rail and ocean travel. In both cases the two Governments have assisted. The new agreement, however, will go all the way, and provide capital for the actual settlement of the immigrant.

Planting Currants

Fall of the Year Best Time to Set Out

The best time to plant currants is in the autumn, says the Dominion Horticulturist, Mr. W. T. Macoun, who continues: If planted in the spring they will probably have sprouted somewhat by the time they will go all the way, and provide capital for the actual settlement of the immigrant. Where the soil is in good condition, currants, especially the black varieties, make strong growth, and the bushes reach a large size, hence it is better to give them plenty of space. They will do better and are easier picked than if crowded. Five to six feet is a good distance to plant. If planted closer, especially in good soil, the bushes become very crowded before it is time to renew the plantation. Strong one-year-old plants are the best, but two-year-old plants are better than poorly rooted yearlings. It is better to err on the side of planting a little deeper than is necessary than to plant too shallow. A good rule to follow is to set the plants at least an inch deeper than they were in the nursery. The soil should be well tramped about the young plants to prevent its drying out. After planting, the soil should be leveled and the surface loosened to help retain moisture.

Destruction Of Weeds

An interesting experiment in the chemical destruction of weeds has been reported from near Chartres, France. A dilute solution of sulphuric acid in water was applied early this season to a field of young wheat, containing about an acre, and the result is stated to have been the practically complete killing of all weeds, while the wheat itself has not only escaped injury, but seems to have been stimulated to more vigorous growth.

Gift to Red Cross

The Saskatchewan Division Canadian Red Cross Society received a gift of \$2,600 from the Overseas Nursing Association, to establish two nursing outposts.

"He came here shortly before noon," explained the skipper. "Said the scarlet special had brought him a summons to Ottawa that could not be denied. He meant to ask you people to take charge until his relief arrived. His years of pioneer service in the North had been rewarded at last, he told us, and he was to make a high official of the Arctic at the Ottawa headquarters. Naturally, we rejoiced with him."

"The nerve of the scamp!" exclaimed the sergeant. "The only word the special brought was a warrant for his arrest. He has been robbing the company for years and they've just found him out—got the proof. I came to arrest him. He must have surmised that the coming of the special meant only one thing—that he was to make his get-away. And howling snags, this warrant I hold is a secret one!—No general alarm has been sent out. Can I see Miss O'Malley—perhaps he's got her something of his plans? In the interests of justice after she's seen the warrant, I'm sure she'll not protect him, what an ass she thinks we!"

The missionary seemed stunned. He bent over his chair and cupped his hands over his eyes in an attitude of prayer.

"Good Lord, forgive us for our sins of omission," Seymour heard him murmur. "We are but mortal and the flesh of all mortals is weak. How were we to know?"

"Here, here!" interrupted the sergeant impatiently, although he had respect enough for prayer. "It's not your fault that Karmack got away or that you let him use Mission House in his courtship. You good fellows have known he had done anything wrong. Send for Miss O'Malley at once. I've no time to lose."

Luke Morrow forgot his supplications for pardon and sprang to his feet. "No time to lose. You're right. That scoundrel was per se usive and we were weak. Karmack took Moira with him, offering her safe conduct to her friends and home in British Columbia. We'll never forgive ourselves for—"

But Sergeant Scourge was gone in too great a hurry to close the door behind him.

CHAPTER XII.

Living Targets

Like a Windigo, broode of the sub-Arctic on the trail of a coven of red, Sergeant Seymour pushed through the white silence in the forest and to the capture of Harry Karmack, embarrased, spurred him officially, the saying of Moira O'Malley from the fate

WOMEN FROM FRY TO FIFTY

Will Be Interested in Mrs. Thompson's Recovery by Use of Lydia E. Pinkham's Vegetable Compound

Winnipeg, Man.—"Lydia E. Pinkham's Vegetable Compound has done me good in every way. I was very weak and run-down and had certain troubles that women of my age are likely to have. I was going to go to the doctor so I took the Vegetable Compound and an still taking it right along. I recommend it to my friends and to any one I know who is not feeling well." Mrs. THOMPSON, 808 Lizzie St., Winnipeg, Man.

When women who are between the ages of forty and fifty-five are beset with such annoying symptoms as nervousness, irritability, melancholia and head flashes, which produce headaches, dizziness, or a sense of suffocation, they should take Lydia E. Pinkham's Vegetable Compound. It is especially adapted to help women through this crisis. It is prepared from roots and herbs and contains no harmful drugs or narcotics.

This famous remedy, the medicinal ingredients of which are derived from roots and herbs, has for forty years proved its value in such cases. Women everywhere bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound.

Women who suffer should write to the Lydia E. Pinkham Medicine Co., Coughour, Ontario, for a free copy of the book, "Pinkham's Private Text-Book on Women's Diseases."

W. N. U., 1539

that seemed in store for her lent wings to his snow-shoes. To himself he did not deny the fact that the personal interest was the most potent. There would be weeks and weeks, it required, to run down the dishonest trader. Didn't the Royal Mounted always get their man? But there were only hours, he sincerely believed, in which to spare the most beautiful feminine creature he had ever seen a lifetime of humiliation and grief.

This was no night for travel. All the rules of Northern travel forbade it. With the spirit thermometer down to sixty-five below, he should have been snugly in camp. In some snow bank, wrapped in rabbit-skin robes or encased in a sleeping bag, with his malnourished snuggled around him. The spirit within that enabled him to defy the inexorable grip of the frost was the same that had not permitted him to delay pursuit's start an hour.

Frankly, he would not have gone out that night after Karmack had the reason been escaping alone. Considering the factor's passenger, however, nothing could have kept him at the Armistice detachment post.

There action had been swift once he had the full facts from Luke Morrow. At quarters, he had turned over the post to Corporal Le Blanc. He was from the Arc company's transport room and furs under seal; to do no trading except that which the welfare of the village required. Hardship might be won if the trusting natives came to the village, but the supplies were found no more. The fact that Karmack was to remain under open guard, unless the displayed signs of wanderlust after his departure, was a matter to take no chances with. The patrols as were absolutely necessary. Thus, like a good commander, he prepared for the worst, many eventualities of winter travel.

Morrow had followed him to offer quarters almost at once with an officer of the Mission House malnourished, the stern chase—stern in more than one sense of the word. Knowing that the police teams were on their way and all the strength of their respective masters is required to keep them apart. The sergeant expected to be engaged otherwise than clubbing malnourished when he got to that break-fast fire.

Accordingly, he untraced the team and chained them to the sled in such a way that any attempt to move that vehicle on the part of the animals heaped to one side would immediately meet with resistance from the dogs on the other side. Such an anchorage he had tried before and proved effective. In fact, about the only one possible in the open snow-fields.

Tossing each of the seven in the team a frozen fish, the sergeant, his parker, exposing to ready grasp the revolver at his hip. From his deerskin case, he unclimbed his rifle and the precaution against being "potted" in case his approach was discovered at too great a distance, was a sure guarantee. Then he moved swiftly forward, the tails of his "webs" leaving a wake of flying snow.

Obviously, the three of the night party were at breakfast; for he bore down on them with a crash, with a alarm. Soon he was near enough to hear the dogs of their two teams snarling over the morsels of meat. That they were gathered between him and his objective, he circled for a safer approach.

Almost was he upon the camp when he saw Karmack departing in the direction of the dogs. Easily could he have picked off the accused dog-beast, with his rifle. But—

"Never fire first!"

With the last slogan of the Royal Mounted he admonished himself under his breath.

Nearer over the crunching snow he crept on that clumsy-looking but most effective footgear which man may have adopted from the snow-shoe rabbit. Now he could make out the front of a pup tent, huddled thrown up for the protection of the heavy party. Karmack, the Arctic's interpreter, could be seen peaking tentacle for the start.

The girl was not in sight. Two minutes more would have brought him into camp and everyone under cover of his rifle. Then, from out of the tent, came Moira, facing him.

He heard her cry out; could not determine whether from surprise at the unexpected appearance of a human stalking out of the white solitude or as a warning to her companions.

Of these, Karmack whirled at first alarm, but the noise did not look up from his task. Evidently the factor, recognized the unwelcome visitor, for he started back with a raw, drawing his automatic as he first.

"Never fire first!" the voice of training whined as the sergeant buried himself toward his life.

Karmack's pistol barked. A bullet whizzed past the policeman's ear, a

this latitude and season, came his reward. In the course of the night's sled run he had worked out of the bare undisturbed country of the forenoon into a region spotted here and there with brush. Now he saw sailing from one of the clumps ahead a spiral of smoke marking someone's breakfast fire.

No difficulty was there in guessing that the smoke came from the barracks. Evidently, from the distance covered, Karmack had driven far into the night, and, moreover, with a chorus of yowls and all the strength of their respective masters is required to keep them apart. The sergeant expected to be engaged otherwise than clubbing malnourished when he got to that break-fast fire.

Accordingly, he untraced the team and chained them to the sled in such a way that any attempt to move that vehicle on the part of the animals heaped to one side would immediately meet with resistance from the dogs on the other side. Such an anchorage he had tried before and proved effective. In fact, about the only one possible in the open snow-fields.

Tossing each of the seven in the team a frozen fish, the sergeant, his parker, exposing to ready grasp the revolver at his hip. From his deerskin case, he unclimbed his rifle and the precaution against being "potted" in case his approach was discovered at too great a distance, was a sure guarantee. Almost was he upon the camp when he saw Karmack departing in the direction of the dogs. Easily could he have picked off the accused dog-beast, with his rifle. But—

"Never fire first!"

With the last slogan of the Royal Mounted he admonished himself under his breath.

Nearer over the crunching snow he crept on that clumsy-looking but most effective footgear which man may have adopted from the snow-shoe rabbit. Now he could make out the front of a pup tent, huddled thrown up for the protection of the heavy party. Karmack, the Arctic's interpreter, could be seen peaking tentacle for the start.

The girl was not in sight. Two minutes more would have brought him into camp and everyone under cover of his rifle. Then, from out of the tent, came Moira, facing him.

He heard her cry out; could not determine whether from surprise at the unexpected appearance of a human stalking out of the white solitude or as a warning to her companions.

Of these, Karmack whirled at first alarm, but the noise did not look up from his task. Evidently the factor, recognized the unwelcome visitor, for he started back with a raw, drawing his automatic as he first.

"Never fire first!" the voice of training whined as the sergeant buried himself toward his life.

Karmack's pistol barked. A bullet whizzed past the policeman's ear, a

narrow miss but as good as a mile. The same the King's turn. He was to his shoulder aiming the gun with which Seymour had won many a prize, cooled by the snow. It seemed, Karmack must bite the snow.

But the gun never was fired. Into direct range between the two men, Moira O'Malley had fung herself, a tall, full-figured figure. The human target, coated from top to toe with a blanket. What mattered it that the school girl of Ottawa was pointing an automatic as steadily as she had held it up upon in the trade room that time back in Armistice. Sergeant Scourge could not fire upon an innocent woman.

He barely saw a whiff of smoke leave the mouth of her pistol, scarcely heard what seemed a double report, when a burning sensation along one temple and across the side of his scalp threw him backward to a fall on his side.

Was it possible that, by some involuntary pressure on the trigger, he had fired at Moira O'Malley? In the paralytic clutch of the moment he could not answer the heart-burning question.

(To be continued)

Why Starve Yourself?

"Improved" Foods Do Not Contain Vitamins Essential To Health

If your food consists of white bread, meat, vegetables boiled into a smooth pap, cooked fruits, manufactured jams and other sweets, you are starving your body of the vitamins, vitamins or living principles essential to your health, which have been refined out or otherwise scientifically removed from all of the above articles of your diet. You may go on living like this for a number of years, but, sooner or later, outraged Nature will impose the inevitable penalties.

Constipation is pronounced by many eminent authorities to be the universal complaint of the civilized world, and is caused by general vitamin starvation of the popular diet.

Apart from the facts that constipation, without one exception, the forerunner of cancer and the colon is the breeding-ground of cancer, you should remember that ninety-five per centum of all the diseases of the civilized world originate with its present faulty diet that, by vitamin starvation day by day, steadily weakens your natural disease-resisting power.

All pills, purgatives and laxatives, which are the use of an enema, containing not less than one quart of water at blood heat, to insure the daily complete evacuation of the colon and prevent the blood absorption of poisons from the bowels. When your life is at stake, can you afford to neglect such a simple and inexpensive precaution?

The highly paid food chemists are responsible for more deaths than were exacted by the entire late war and, by their poisonous dyes, preservatives and scientific refinement of Nature's abundant provision continue to wage remorseless war upon helpless women and children who, besides their natural protectors, also become victims of the foodless food manufacturers.

For the preservation of your future health and that of your dear ones stop eating "improved" foods, tinned goods of any sort and the white bread and white flour products that kill 400,000 little children under ten years of age every year in the United States (McCamp). Inset upon whole wheat bread, plenty of fresh uncooked fruit and vegetables. If you must cook your vegetables, steam them only and either drink the water or use it as a foundation for vegetable soup. You are entitled to enjoy every minute of your life from the cradle to the final rest, and if you have any doubt about what to eat in order to keep you in perfect health the writer will gladly and freely make up his dietary treatment if you will write for it to Charles

CANCER

GREAT SUCCESS OF
CANTASSIUM TREATMENT
A well-known London Surgeon and recognized authority on Cancer has created worldwide interest in the discovery of "cancer salts" in the body, which causes the cells to break down and become malignant.

In order that everyone may learn a remarkable book has been specially written.

This book will be sent free to patients or anyone who is interested in the most successful method of fighting "THE CANCER SCOURGE." The following is a list of the chapters:—

1. The Limitations of Surgery. 2. Some Doctors Oppose Operation on Cancer. 3. The Body Cells Break Down. 4. Why the BODY CELLS BREAK DOWN. 5. The Cause of Cancer. 6. Common Errors in Diet. 7. Vital Elements of Food. 8. The Cause of Cancer. 9. The Chief Minerals of the Body. 10. The Cause of Cancer. 11. The Cause of Cancer. 12. The Cause of Cancer. 13. The Cause of Cancer. 14. The Cause of Cancer. 15. The Cause of Cancer. 16. The Cause of Cancer. 17. The Cause of Cancer. 18. The Cause of Cancer. 19. The Cause of Cancer. 20. The Cause of Cancer. 21. The Cause of Cancer. 22. SNOWDEN WARNS BRITAIN AGAINST TRADE MENACE

London.—While the echoes of the applause raised by the successful conclusion of the London conference on the experts' reparations plan still reverberate throughout Europe, the stage is being set for a sinister epilogue, with Great Britain and France taking their old roles of economic rivals, fighting for commercial ascendancy.

If any doubt remained as to Great Britain's policy regarding the Ruhr, it faded when the Manchester Guardian published an interview with Philip Snowden, Chancellor of the Exchequer, not only backing Mr. MacDonald in his protest over the prolongation of the French military venture in the Ruhr, but protesting against the proposed new commercial agreements between Germany and France. He warns British industrialists that France has designs upon the economic control of certain German industries, using political means to attain this object.

The proposed commercial agreement, Mr. Snowden declares, is one method by which the French industrialists, aided and abetted by their politicians, intend to advance their project.

"I warn British commercial interests, especially the textile and iron trades, to be alert in this matter," says Mr. Snowden. "The draft of the commercial agreement shows that to Great Britain this is a trade menace of the most serious character."

Believes U.S. Must Recognize Soviets

Third Party Evidence of Changing Thought Says Rakovsky

Moscow.—Discussing the influence of the United States and the Anglo-Russian agreement embodying general and commercial treaties, Christian Rakovsky, the Russian Charge d'Affaires at London, who signed the treaties, said:

"America is at present the most conservative capitalist country. Under the mask of defending democratic principles, it protects the interests of the big American capitalists. America strives to place Europe under its economic guardianship, but Russia's social regime presents for the United States' capitalists the greatest obstacle in establishing their authority over the European and Asiatic continents."

In the opinion of M. Rakovsky, the United States will ultimately be compelled to recognize Soviet Russia, as he contends there are signs of big changes in the international life of the United States. "He cites the appearance of the 'third party' as furnishing the best proof that 'America has been forced out of the social equilibrium which hitherto has served as a guarantee of her conservatism.'"

Ottawa Knows Nothing Of Wainwright Oil

If Big Strike Were Made Department Would Be Advised

Toronto.—A special dispatch from Ottawa says:

"The Interior Department has not received any word from its officials in the district, confirming the claim that British Petroleum has struck a 500-barrel oil well at Wainwright, Alberta, in addition to the one opened last fall."

"Inquiry at the mines, Northwest Territories, and Dominion Lands branches failed to elicit any sign for the report. If such a big strike were made it is assumed that the department would be advised. It is known, however, that the company is boring."

Canadian Song Writer Dies

Guelph, Ont.—A cablegram has been received here telling of the death in London, Eng., of Mrs. Laura Lemon Heath, who was accounted one of Canada's greatest song writers. As Laura Lemon, she wrote a number of patriotic numbers, but apart from these her best selection was "My Ain Folk."

Laura Lemon was the daughter of the late Andrew Lemon, Q.C., of Guelph and Winnipeg, and widow of William Heath, of Winnipeg.

No Demonstration As French Troops Depart

Offenburg, Baden, Germany.—Popular rejoicing over the departure of the French occupational troops from here, Appewweil and a number of neighboring villages, finds mute expression in the Liberal display of the German republican colors, which are flying from almost every house and public building in the places affected by the troop movement. The evacuation proceeded in an orderly fashion, the French avoiding every display of ostentation which might prove offensive to the German citizens who also refrained from demonstrations which might have nettled the departing forces. A large contingent of French civilians and their families followed in their wake.

Hudson's Bay Ship Safe

Caught in Arctic Ice Pack is Drifting Toward Northwest

Ottawa.—Failure of the Hudson's Bay ship, Lady Kinderley, to get through to Herschel Island will necessitate postponement of the establishment of a radio station there.

An officer and two men of the Department of National Defense are at present stationed on Herschel Island and the schooner carries supplies and equipment for the erection of a radio station there, which will be one of a chain of stations proposed in Northern Canada for military and commercial purposes. Even if the Lady Kinderley succeeded in reaching the island shortly, it would be too late in the season to commence construction.

Besides carrying supplies for Herschel Island, the Lady Kinderley carries food supplies and equipment for the Mounted Police posts and settlements at the mouth of the Mackenzie River. It is expected when clear of the ice the boat will proceed to these posts with the supplies.

The men station on Herschel Island, it is stated, will not return with the boat, but will come out overland when winter sets in.

Nancouver.—The Lady Kinderley, believed to have been abandoned in the Arctic Ocean, is still safe and sound, though caught in an ice-pack, and, with her crew on board, is drifting toward the northwest and possible escape from the ice, according to a wireless message received from the ship by C. H. French, district manager for the Hudson's Bay Company.

Trying To Blaze Trail To The Coast

Detroit Autists Plotting Car Across Prairie to Vancouver

Winnipeg.—A. F. Bement, Vice-President and Secretary of the Lincoln Highway Association, and H. E. Evans, both of Detroit, are seeking the honor of being the first tourists to pilot an automobile across the prairie to the Pacific coast.

If successful in their undertaking the trail blazers will be rewarded with a gold medal offered by the Canadian Highway Association. This prize has been waiting to be claimed for several years, and although several attempts have been made to negotiate the distance, none have been successful to date.

Quake Kills Forty-One

London.—An earthquake near Osh, in the province of Semirechinsk, Russian Turkestan, has caused the death of 41 persons in three villages and rendered 8,000 homeless, says a dispatch from Allahabad, India. More than 4,000 houses were destroyed.

B.C. Forest Fire Damage

Prince Rupert, B.C.—Forest fire here burned over three square miles near Alice Arm, destroying one of the best stands of timber in the district. The outbreak was reported under control. Every available man had been fighting the blaze for several days.

Two Fire Victims

Winnipeg.—Trapped in the loft of a burning stable at their farm home near this city, Oliver and Lancelot McGill, aged three and four years, respectively, were burned to death. The origin of the fire is unknown.

Australia's first factory for the production of tennis rackets has been opened at Melbourne.

Gave Interesting Address

PROF. R. M. McIVER of the University of Toronto, who delivered an interesting address on civilization and population at the British Association convention.

Prince Will Avoid Public Functions

Appreciated Privacy Attending Visit To Canada Last Year

The Prince is anxious to reach his ranch at the earliest possible moment and his stay on Long Island, where he will witness the international polo matches between teams representing Great Britain and the United States, will positively be his only stop on his way to Alberta. What he may do on the return journey is as yet undecided, although it is certain he will avoid any public functions. Perhaps the Prince will stop over at Jasper Park, Alberta, and during the time he is holidaying at his ranch he will likely spend a weekend at Banff.

The Canadian Press has authority for stating that the Prince of Wales and his suite appreciated and were extremely gratified by the privacy which attended the visit of His Royal Highness to Canada last year, and the Prince is looking forward to similar privacy on his forthcoming visit.

Subduing Scarlet Fever

St. John, N.B.—The opinion that within one year an anti-toxin for scarlet fever would be perfected and standardized, and that that disease would be as subject to control as typhoid fever, was submitted by Dr. H. B. C. Cushing, of Montreal, before the New Brunswick Medical Society here.

Perilous Trans-Atlantic Voyage

New York.—With Gibraltar as his destination, Dimitrie Sigheols, a Cretan seaman, has embarked upon a perilous trans-Atlantic voyage in a 22-foot sail boat. His only motive in making his trip is to experience the thrill of achievement, he said.

These three little children, named George Reid (6), William Reid (7) and Nan Reid (5), travelled from Glasgow to Canada on their own on the Canadian Pacific liner "Marjoch." They hailed from Greenock and joined their daddy in Quebec.

Africa Will Not Exhibit Next Year

London.—Commenting on a report from Cape Town that the Government of South Africa had decided not to continue its exhibits at Wembley next year, it is the British Empire Exhibition is open again in 1925, a South African authority in London says this is probably due to the fact that the South African Government is hard up and cannot afford to spend the money that would be required for a second year of the exhibition, South Africa not being in as good financial position as either Canada or Australia.

Manufacturers Now Appeal To Board

Ask For Removal of Discrimination Due to Crow's Nest Rates

Toronto.—Application will be made by the Canadian Manufacturers' Association to the Board of Railway Commissioners for the removal of the undue discrimination which, it is claimed, is created by the establishment of reduced rates between certain points by the Canadian Pacific Railway and the Canadian National Railway.

The rate complained of became effective on July 7, when legislation authorizing the Board of Railway Commissioners to increase rates above the maximum set by the Crow's Nest Pass Act expired. Tariffs were issued by the C.P.R. and C.N.R. at the same time, applying the new rates, however, only from those points which were common to the C.P.R. and C.N.R. as published in the C.P.R. tariff. The situation created by the new tariffs, it is stated, has caused numerous complaints from all parts of Canada against the disturbances and discriminations of rate adjustments which will work considerable hardships against both shippers and receivers.

Will Have Third Trial

Rev. Adelaar Delorme to Appear at September Sessions

Montreal.—According to La Presse, French language newspaper of this city, Rev. Adelaar Delorme, twice tried for the alleged murder of his half-brother, Raoul, will come up for his third trial at the September sessions of the Court of King's Bench here. The paper says that R. L. Calder, K.C., crown prosecutor, affirms this, and that the presiding judge at the trial will be Mr. Justice Demers, of the Superior Court. It adds that Delorme will be tried again in spite of the fact that he has recently been examined by alienists. The King's Bench will open September 10.

Mars Under Observation

Washington.—Theobos and Demos satellites of the planet Mars will be under observation by the naval observatory here during the present month when Mars will be closer to the earth than it has been for several years.

GERMANY MAY PLACE A HEAVY TAX ON WHEAT

Winnipeg.—A report was received from Europe by the export branch of the Winnipeg grain trade, and incorporated in other official quarters, that the German Government had expressed its intention of introducing in the Reichstag a bill providing for the placing of a heavy import duty on wheat and flour.

The particulars received indicate that the duty to be imposed will be equivalent to 35 cents a bushel on wheat and 50 cents per barrel on flour.

Germany, it is feared, has a very excellent potato crop this year, and the purpose of the import duty on wheat and flour is to make the people consume potatoes and potato flour, and other home products, as they were compelled to do during the war years. Further, it is explained this action has been taken to cut down the importation of foreign foodstuffs to the minimum, and, at the same time, give encouragement to the local farmers in an effort to increase acreage and production.

A New York exporter, when queried respecting this new development in the bread grain situation of the world, stated that it would undoubtedly have a bearish effect on prices. The import, he declared, would in all probability cut down Germany's importations by from fifty to seventy-five million bushels during the next 12 months.

Had Subterranean Farm

Montreal Signer Kept Pigs, Goats and Chickens In His Cellar

Montreal.—Signor Giuseppe Mauro, Neapolitan, landlord of an east end house in this city, is also the proprietor of a unique subterranean farm. Invention of the turned and feathered inhabitants of the farmyard taken by Fire Commissioner Ritchie revealed the fact that the original population comprised three pigs, two goats, about forty chickens, all of which were flanked in the cellar by a large barrel, a pile of coal and a stack of wood.

Over the farmyard live Giuseppe and his family, his wife and their nine children, the husband of one of the girls and a newly arrived granddaughter.

These details were obtained at the enquiry into the fire which broke out in the Mauro household on August 16. The only casualties in the blaze were two goats, which succumbed to smoke.

To Consult Premiers

About H.B. Road Plan

Delegation Will Get Opinion on West Finishing Railway

Winnipeg.—A suggestion made some time ago by a former member of the Federal Cabinet that the Governments of the prairie provinces should take over and operate the Hudson's Bay Railway, has been discussed with Premier Bracken, of Manitoba, and members of his cabinet by a delegation from the "On-to-the-Bay" Association, but no definite plan was decided upon. The plan would have to be acceptable to both the Federal and Provincial Governments, and it is stated that the views of the Saskatchewan and Alberta Premiers will be sought shortly. A delegation from the association's executive will interview the western premiers on the subject.

Jewel Robbery In Boston

Loss In Daylight Theft From Diamond Merchants Is \$150,000

Boston.—Diamond and jewelry valued at about \$150,000, were stolen by four men who held up the clerks in the store of Carl B. Skinner, diamond merchant here. One man remained in the automobile, two covered the three clerks with revolvers, while the fourth picked up the jewelry cases which had just been removed from the safe.

The store had just opened for the day and no customers were present. The robbery was accomplished in less than five minutes. The robbers then jumped in their machine and drove off through the cross streets of the southeast. A policeman who gave chase in another car lost them in the maze of streets.

ALL ON THEIR OWN TO CANADA

These three little children, named George Reid (6), William Reid (7) and Nan Reid (5), travelled from Glasgow to Canada on their own on the Canadian Pacific liner "Marjoch." They hailed from Greenock and joined their daddy in Quebec.

WESTERN CANADA'S RIVER OF WHEAT

A NEVER-ENDING stream of gold, flowing from the farms of the Prairie Provinces to the consumers of bread stuffs in all parts of the civilized world, is represented by the movement of the farmers' grain to the world markets. Beginning in August each year and in some years flowing constantly forward until August of the following year, this everlasting river of wheat is Western Canada's contribution to the feeding of the civilized world. In the movement of this crop from the country elevators and loading platforms of the Prairie Provinces, the Canadian National Railways year by year are playing a more important part.

Long before the western farmer has finished his seeding in the spring, preparations have been begun by the railways to move his crop. Cars must be ordered, for each year more equipment is needed for the movement of the grain; other cars, which have been in service, must be brought into the repair yards and overhauled or rebuilt according to their needs, for the movement of grain is a strenuous work and grain cars show the effects of a season's haulage. And, since cars could not move forward without motive power, new locomotives of immense hauling power are necessary and must be ordered, while those which have already been service in this strenuous work must also be

So, as the season approaches for the harvest of the grain, the binders to be heard across the prairie, everything is

of the company through the western region, compile a report on the loadings and movements of grain cars at the close of each day. These reports are telegraphed to Winnipeg where, with advices from the lakehead and Vancouver, they are assimilated. Hence, with one single report simply compiled, the entire

Canadian National lines in the Western region almost continually, and that every movement of these cars must be checked in order that there shall be no confusion or delay in their handling, the enormity of the work of handling the grain movement may easily be realized. And to handle over 175,000 cars of grain

Farmers' Grain at Line Elevators

being prepared for the rush of the harvest work. Constant vigilance in this, as in every other great movement, is the price of safety and nothing is left undone to ensure that the movement forward shall be rapid, even, and unhampered. An important department, whose work is little seen outside of railway circles, is the Car Service Department, whose eye is watching night and day to see that grain cars are properly distributed and that once loaded, they move forward rapidly to the lake or ocean port from which further shipment is to take place.

During the grain rush each fall the Car Service officials meet a difficult situation, for instead of an even balance of haul back and forth through the west, there is an over-

grain situation is shown for the preceding day throughout Western Canada. Figures for previous years are also kept on record with the reports as they come in and at any time comparisons may be made to show the progress over

Lake Carrier Loading at Terminal

brought in to the huge repair shops where they are overhauled and made ready for use. Nor is this all. In preparation for the movement of heavy trains loaded with wheat and in order that there shall be no delay en route from the farmer's hands to the lakehead or to Vancouver, roadbed and other facilities must be in the best possible condition. Therefore during the summer months every foot of the track over which the grain must move is subject to careful inspection and improvement; ballasting is done wherever it may be required and all parts of the system are kept up to the highest pitch in order that no hitch may occur in the movement of the crop.

Weeks before the crop itself begins to move, there is another movement under way which has an important bearing on the steady flow of grain to the markets of the world, and this is the gradual concentration of locomotives and grain cars at strategic points on the western lines, so that they will be available for rapid distribution wherever they are needed.

wholly large exodus from the grain fields with a proportionately small freight movement back toward the prairies. Here the Car Service Department faces the task of moving these empties back from the lake or ocean ports, to line elevators at the lowest possible cost and it is only by wise and careful scrutiny of the situation that it is possible for this work to be successfully carried out.

An elaborate system of tabulating the grain situation daily is operated by officials of this department. Each day through the press there appear reports on the grain movement, both on lines through the west and at the head of the lakes where ships are fast loading from terminal elevators as cars discharge their cargoes.

To make this possible, agents

the same period each successive season for five years.

When it is realized that upwards of 50,000 grain cars are on the

to the two outlets, the Great Lakes and the Pacific ports, means that train loads of grain must be kept constantly on the move, both eastbound and westbound. The growing importance of the Pacific outlet is shown by the fact that Canadian National car deliveries to Vancouver during the grain year just closed, have been almost five times as great as during the season of 1922-23, and as more facilities are provided for the handling of the westbound shipments it is expected that the next few years will see enormous gains still being made year by year in this movement.

Loading Wheat into Box Cars

WORLD HAPPENINGS BRIEFLY TOLD

Prof. J. C. Flugel, of University College, London, England, has compiled a chart of human experiences.

Percy Sims, a Canadian engineer, has been appointed assistant chief mechanical engineer of the New Zealand Government Railways.

The importation of all cattle, sheep, pigs and goats into the Isle of Wight is prohibited owing to foot-and-mouth disease.

Viccount Grey of Palladen, former Secretary of State for Foreign Affairs in the Asquith Government, has retired from the Liberal leadership in the House of Lords for personal reasons.

Mrs. Emily Stinton Nelson, widow of Hon. Hugh Nelson, former Lieutenant-Governor of British Columbia, died at the Westminster Private Hotel, Toronto, where she had been staying.

According to official statistics just issued the value of the alcoholic beverages consumed in Norway in 1935 aggregated \$40,770,000. This is at the rate of about \$16 for each inhabitant.

Countess Glycks, formerly Miss Eleanor Patterson, of Washington, D.C., America's most noted woman game hunter, has gone on a private camping expedition into the Canadian Rockies.

A 13-year-old boy is one of the leaders of the Communist party at Gera, in Central Germany. His fluency of speech and commanding manner on the platform attracts large crowds to his meetings.

Prince Arthur of Connaught is spoken of as the next Viceroy of India, it was learned in London. Lord Reading, the present incumbent, will probably finish his term of office, twelve months of which have not expired.

The freight steamer Torham Van, from Toronto and other ports on the Great Lakes arrived at Vancouver, B.C., with a full cargo of Ontario manufactured goods. The vessel was two months on the voyage.

Bees' wings beat the air at the rate of 190 strokes a second.

B. C. Apples

Expected That There Will Be a Sixty Per Cent. Crop This Year

(By J. Alex Adams)

Kelowna, B.C.—There is a decided opinion here that the apple crop will be a 60 per cent. crop, due largely to unfavorable weather conditions. There is no getting away from the fact that fruit growing in this valley can only be assured from year to year by irrigation, just as is the case in the States to the south. The fruit farms which have water this season are promised a very good yield, but otherwise the outlook is not bright.

There remains plenty of land along the hills below the water line, and in the valleys waiting to be taken up and used. The Chinamen are working some of the left desirable land and raising a lot of vegetables. Up to the present time there have been 90 cars of vegetables shipped out of the valley this season, and most of that product is from the Orientals land.

The drought this season gave invitation to grasshoppers and they are in plenty on some land. The provincial fruit branch has ready use to all who will take it to their own hand a preparation of bran and molasses and vanilla which proves that the hopper likes the rum and the fatal jag. The stuff is effective and has saved many acres of tomatoes and small fruits and vegetables.

For sometime Jonathan growers were troubled with early decay in that variety. Careful inquiry and research on the part of the Federal Fruit Branch led to the sure knowledge that the trouble had been caused by the picking after the fruit had passed picking maturity. It was found beyond question that where the Jonathans were picked early they had the keeping quality desired and proper good right through September to December. Therefore, it will in future be safe for Jonathan lovers to buy their favorite apple.

The growers are seeing it is advisable to concentrate on a limited number of varieties in order that they may be able to supply demand in cashists as ordered. Formerly growers set out a wide number of varieties, not foreseeing the situation as it has since developed. Along with the greater concentration there will be attention paid to giving out information on the season for the ten varieties which have been adopted. And while there is the standing doctors and the fact that it is always time to eat an apple, the apple men will tell you that it is just as much of a mistake to eat an apple at the wrong time or season as it is to try to masticate an unripe peach.

The ten varieties and the time when they are at their best follow: The Early Duchesne, Wealthy, Sept. to Nov.; McIntosh, Oct. to Jan.; Jonathan, Sept. to Dec.; Delicious, Nov. to Jan.; Grimes Golden, Nov. to Jan.; Wagner, Nov. to Jan.; Spitzenberg, Nov. to Jan.; Yellow Newtown, Jan. to April; Winesap, Jan. to April. The Canadian Pacific Railway gives exclusive service to the Okanagan Valley and is quite equal to all demands for traffic. During the past year two important concessions have been made to shippers. The first, and an important one, is that of protection of fruit against frost. This form of insurance enables the shipper to go right on using freight cars, so long as the weather is reasonably moderate, after which shipments have to be made in refrigerator cars. The other concession, not less valuable, is that cars of fruit by express may be opened for delivery twice enroute to final destination point. The effect of these arrangements is to facilitate movement of the crop promptly and hold down the cost of transportation, which in turn affects the consumer's price.

The average net price received by growers for apples last season was about 40 cents per box, or some varieties as high as 70 cents was paid the growers, but plenty of apples did not bring more than 20 cents. The average cost for packing and shipping is found to be 70 cents, which includes administration charges. This question is being made the subject of a special inquiry by Major Duncan for the Federal Department of Labor.

The most obstinate cures fail to resist Holloway's Corn Remover. Try it.

It is not generally known that flour, sugar, starch or grain dyes are capable of working greater havoc than a high explosive such as dynamite.

Minard's Liniment for Rheumatism

You need not hide skin defects—now.

Millions know this simple way to avoid them—to keep skin lovely, youthful

Do not make the mistake of attempting to cover or hide skin defects. It can never succeed. And there is a better way—which millions know.

This simple method to avoid them—to keep the youthful radiance and clearness of schoolgirl complexion.

For a week do this

Cleanse the skin regularly, au-

Made in Canada

thorities say, to keep your complexion lovely, radiant, youthful. But beware of harsh cleansing methods. They injure skin.

Wash thoroughly with Palmolive Soap—each night before retiring. Rub the creamy, foamy lather well into the tiny pores. Rinse—and repeat the washing. Then rise again.

Then—if skin is dry—apply a little cold cream. That is all. Skin so cared for is not injured by cosmetics, by wind and sun, or by dirt.

Volume and efficiency produce 25¢ quality for

10¢

The simple, correct way

You cannot find a more effective beauty treatment. Because Palmolive Soap is blended of rare palm and olive oils—famous for mild but thorough cleansing qualities since the days of Cleopatra. And it is inexpensive. Enjoy it for the bath also.

But be sure you get Palmolive—which is never sold unwashed. All dealers have it. Get some and follow this simple method for one week. Results will delight you, even in that short time.

THE PALMOLIVE COMPANY OF CANADA, LIMITED

Winnipeg Toronto Montreal

Palm and olive oils—nothing else—give Nature's green color to Palmolive soap.

Britain Building Up Forests

British Forestry Committee Has Already Started Tree Planting. The British Forestry Commission is planning a forest station development in a huge area of East Anglia with the idea of creating the largest forest in Great Britain. Tree planting has already begun.

The area under development is a vast sandy wasteland. The plan includes the creation of workers' holdings for one hundred families.

It is expected that this development will be profitable not only in the production of timber, but in the increased fertility of the surrounding land.

Corns, Warts, Bunions,

Painlessly Removed

Don't limp any longer, don't suffer another bout from corns. The oldest remedy and the best, the one that for fifty years has proved a true success, will lift out your corns in a hurry. Putnam's Painless Corn and Wart Extractor is the one remedy to use. Refuse a substitute. Use everywhere.

Settlers interested in irrigated lands. Irrigated farm lands at Taber, in South Alberta, are attracting prospective settlers from the United States and Eastern Canada, and several land scouts have been sent to the vicinity by colonization organizations.

Stop the Cough—Coughing is caused by irritation in the respiratory passages, and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Electric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

Donata's Plane to Japan. Captain Georges Pelletier D'Oyley, the French aviator who recently completed a flight from Paris to Tokyo, has donated the aeroplane in which he made the last leg of his journey from Shanghai to the Japanese army.

FOR COLIC AND CRAMPS PAINS IN THE STOMACH THERE'S NOTHING TO EQUAL

It has been in use for the past 30 years; its action is pleasant, rapid, reliable and effectual, and relief comes promptly. Be sure and get "Dr. Fowler's" when you ask for it. Don't experiment with some new and untried remedy.

SUNDAY SCHOOL LESSON

AUGUST 31

JESUS TALKS WITH A SAMARITAN WOMAN

Golden Text: God is a Spirit; and they that worship Him must worship in spirit and truth. John 4:24.

Lesson: John 4:24-42.

Devotional Reading: Psalm 25:1-7.

The Text Explained and Illuminated

Living Water, verses 7-14. Most commonplace events are but milestones that mark our progress along the road we are travelling, yet some give turning-points which send us in another direction: such a turning-point was the grand old woman of Samaria to the village well for water. There she met Jesus. Jerusalem had not received its Lord, and he was on his way to "his own country" of Galilee, and was passing through Samaria. On reaching Sychar, Jesus, being wearied, sat down to rest on the curb of Jacob's Well, while his disciples (the five first called) went on to Sychar to buy food. As the woman approached, Jesus asked her for a drink. In surprise, she exclaimed: "How is it that thou, being a Jew, askest drink of me, who am a Samaritan woman?" (For Jews have no dealings with Samaritans, the Evangelist explains.) At this time either it was permissible to trade with the Samaritans (verse 8) or the disciples ignored the law against it, but no Jew would ask a favor of a Samaritan. "The woman's reply is a light-hearted way of entering into conversation by posing the ball back to the unknown Speaker—joined to some satisfaction that the circumstances enabled her to be easier to a Jew. What! a Jew can deigned to be bothered for a drink to a Samaritan! And does he expect to get it? Who could have believed it?" (Talbot).

Jesus' next word to the woman is full of yearning distress—If you knew what God's blessings are, and how freely he gives them, if you knew that he who speaks to you has it in his power to give them all, you would be the seeker then, and he would not refuse you, he would give you living water. "Living water" in the literal sense means good spring water, water from a living spring instead of cistern water.

Radio Set For Prince. Token of Appreciation From Radio Fans of America. When the Prince of Wales stepped aboard the Cunard liner Berengaria on August 23, for his trip overseas, he received the most magnificent radio set ever constructed in the United States. It was presented to him by W. Roy McNamee, President of the Stromberg-Carlson Telephone Manufacturing Company, as a token of appreciation and goodwill from the radio fans of America. The set, which is a five-tube Neutrodyne, is mounted in a console of Adam Brown Mahogany with everything self-contained. All its control parts are gold-plated. The set was delivered to the Berengaria and taken across the Atlantic aboard that ship on its eastward passage, so that presentation could be made immediately after the Prince boarded the liner in Southampton.

Minard's Liniment Heals Cuts

Helping the Starving Greek Refugees

Appeal is Made To Western Canada To Lend Assistance To Worthy Cause

Western Canada to be appealed to, through The Save the Children Fund, of London, England, in aid of the half-million or more women and children who are among the Greek refugee army, driven out of Turkey under the Treaty of Lausanne. They constitute one of the greatest tragedies of the post-war period, as they are among the victims of war. They have poured into Greece, homeless, helpless and hungry, and they are dying like flies from starvation and disease.

Other parts of Canada are responding to this pathetic appeal, and the farmers of Western Canada are asked, through a grain campaign, to do their bit contributing a few bushels of wheat when selling their crop at the elevator. The various grain elevator and united farmer organizations are co-operating.

A strong western committee has been formed, with Mr. C. W. Rowley as Honorary Treasurer, with offices at 305 Scott Block, Winnipeg. The campaign is endorsed by Premier Bracken, Premier Greenfield, Hon. T. A. Cregar, and other leaders. It is confidently expected that the west, as always, will make as generous a response as the crop situation will permit. No Canadian will be the poorer for sharing a little of his substance with the starving kiddies in any part of the world.

Mr. Frank Yeigh, of Toronto, the well-known Canadian writer and lecturer, has arrived in the west to assist in the campaign, after having conducted a successful one in Ontario which brought in \$25,000.

Those who prefer to make a cash contribution may remit to Mr. C. W. Rowley, 305 Scott Block, Winnipeg.

Plums are among the few trees that can grow at a high altitude.

Stony Plain and District.

The train to Vancouver was four hours late yesterday morning.

W H Chapman, 78 years young and hale and hearty, arrived in Stony Tuesday from Merriden, Conn. "Bill" is a real Yank—a rarity in these parts. Bill says he came across the continent by trail, and he has the documents as proof of his stopping places. These he carries in an old cloth wrapper, and they proved quite interesting on perusal.

The results of the departmental exams, at Stony High school will be published in The Sun so soon as received from the Principal, or the secretary of the board.

Among those pupils at the Glory Hills school fortunate in passing Grade X exams were Mary and Tofel Gambel.

Old St. Matthew School is in charge of Rev A Gaults as teacher.

Miss Wood and Miss Laferty will be the teachers in charge at Glory Hills school when it opens Tuesday next.

Miss Brown is in charge of Atim Lake school, which opened this week.

Supplementary departmental exams will be held in the University, Edmonton, commencing Tuesday next and continuing to Sept 10. Several Stony Plain pupils have intimated their intention of going in.

Grain-cutting now is general thru the district, with some farmers cutting wheat, some barley, and a few cutting green feed.

Wheat has been slipping down in price since the last Sun was printed. Thursday it slid down 2c a bu., Friday 3c more, and Saturday the same—a total of 12c reduction in three days.

The initial payment in the 1924 Wheat Pool will be a substantial increase on the payment made in 1923.

A crowd which filled the Holborn Hall danced to the good music provided by Martin's orchestra on Friday night last. Stony town was well represented, and all report having had a good time.

Onoway's annual Fair is being held Wednesday next, Sept. 3.

Tires and tubes vulcanised and repaired at Stony Plain Garage.

Accident at Blueberry

While Mr and Mrs Andruschysyn, who live north of Carvel, were driving down to Stony Plain Tuesday morning with their two children in a buggy, their team shied at a dead animal lying on the road near the Pete Schram corner at Blueberry. The horses swerved, overturning the buggy and throwing the four occupants out on the road. Three escaped with a few bruises, but Mrs Andruschysyn sustained a bad fracture of the leg at the knee, from which it will take quite a while to recover. The injured lady was attended to by Dr Walton.

Sporting Notes.

McCulla's reorganised ball players played 6 innings with Wabamun on the 20th, and defeated this team 5 to 3. The Big Chief had much better luck at bat than he had on Fair Day.

The League ball game last Thursday between Duffield and Wabamun was won by the former 16 to 5. A young man by the name of Liblich was pitching for Duffield, and is reported to be a phenom.

Stony's ball team played Wabamun on Sunday a very good game of ball, but the western team was the superior, as the score stood 11 to 7 at the close. These players journeyed up: Ph Sinner, Hy Treit, Val Mohr, McCulla, S Zucht, Chessor, Geo Graden, Sheppard, Wood, McDonald.

Evansburg ball team, which defeated all-coners on Sports Day at Stony, has sent an invitation to Stony's ball team to be present at the big tournament at Evansburg Sunday and Monday next, the latter date being the mining town's annual Sports day.

Young Val Mohr, the well-known ball player, who is now on vacation, was last week made a very flattering offer to play ball with a local team, but refused it. He probably may play with a Western team in Monday's tournament.

Stony's ball players were idle in Evansburg yesterday, to play two postponed games, but were unable to make the trip.

Two members of the Roil Archery Club were out Tuesday for a practice shoot, killing four crows and knocking the tails from two others.

The Postoffice footballers are coming to Stony again on Saturday next, when another good game is in prospect with the City kickers.

The local road committee is arranging a regatta for the Conneillors on Ducholke lake, on Main street, with the starting buoy right behind the tin-shop.

Stony Plain basketballers played St. Matthew's team on Monday night, on the latter's grounds, when the St. Matthew's girls won by 18 goals to 10. The playing was good and snappy.

TENDERS FOR PURCHASE OF FARM.

TENDERS WILL BE RECEIVED BY THE UNDERSIGNED ON OR BEFORE TUESDAY, THE SECOND DAY OF SEPTEMBER, 1924, for the purchase of the North-East Quarter of Sec. 34, and the North-East Quarter of Sec. 12, both in Township Fifty-One (51) Range One (1) West of the 6th Meridian. Tenders to be for price on both quarters or on each quarter separately. Purchaser to state whether he will pay all cash or the terms on which he desires to purchase the said land.

The lowest or any tender not necessarily accepted.

F. W. LUNDY,
Stony Plain, Alberta.

Here and There

The value of Ontario's mineral production for the first quarter of the present year, as shown by a report of the Department of Mines, has increased \$2,382,000 over the corresponding quarter of last year, the total being \$11,575,151 and \$9,241,853 respectively. Silver was the only metal of importance to record decreased production during the period under review.

Among the passengers sailing on the Canadian Pacific liner "Montreal" for England on July 8th, was E. W. Beatty, Chairman and President of the Canadian Pacific Railway. While in England, Mr. Beatty is scheduled to address the Associated Advertising Clubs of the World on July 17th on the subject of "Building an Empire with Advertising."

Excellent reports as to the hunting in the Caribou district of British Columbia are being received. F. W. Prudden and Fred Staves' party returned from a month's sport in that district with an excellent specimen of grizzly bear weighing about 1,400 pounds. They saw moose, caribou, deer, black bear, pheasant and grouse, and consider the district a hunter's paradise.

Addressing the annual meeting of the Bond Debtors' Association of Canada at Toronto recently, the President declared that during the 12 months ending May 31, 1923, 917,000 worth of Canadian bonds had been distributed, this being by far the largest total issued in the Dominion in any post-war year. The most striking feature in this connection is that about 50 per cent was absorbed within the borders of Canada.

On June 18th Winnipeg, Man., celebrated the fiftieth anniversary of its incorporation. From a struggling frontier village of the 70s Winnipeg has forged into the position of third largest city in the Dominion, with continental reputation as a railroad centre. It is the Gateway of the West and 160,000,000 bushels of prairie grain pass through it to the head of the lakes, whence it goes to the markets of the world.

Twenty-five officers and 200 men of the Royal Navy, from the spot of service squadron headed by H.M.S. Hood, enjoyed a trip through the Rockies over the Canadian Pacific lines while their ships were anchored at Vancouver recently. The sailors, who made a point, in true naval style, of seeing and doing everything, were enthusiastic over the scenery at such show-places as Banff and Lake Louise, which they declared the most beautiful they had seen in all their world cruise.

To add encouragement to the raising of high-class swine, which is being fostered by the governments of Manitoba, Saskatchewan and Alberta, the Canadian Pacific Railway is awarding a champagne cup to the Boys' and Girls' Swine Clubs winning the club competitions in these provinces. The cups are for annual competition, but will become the property of the club if won for three years in succession. Medals will be awarded individual members. This year winning teams resident on the Company's lines will also be granted a free trip to the Royal stock show at Toronto.

The Arts, Science and Letters Society of the Province of Quebec recently sent a questionnaire to various parishes of Quebec and Montmagny counties, seeking information as to the age and size of families residing in those territories. It was discovered that the family of Imeal Bedard had remained on the same land at Charlesbourg since 1629, that the largest family in Montmagny was that of Hector Lauberts, of St. Jean, Island of Orleans, who has 20 children living, and that Joseph Gagnon, St. Pierre, Island of Orleans, has the largest number of living descendants, 210.
